5. Disclaimer:

The technical used software solutions are tested and used from years (starting with 2014). The solution implementation may require IT and Amazon AWS knowledge, check the solution presentation web page (<https://www.my-drive.cloud/services.html>) for a solution integrator that can assist with the implementation and customization.

Basic technical support is offered by email to a system administrator in case there is no integrator that offers technical support or maintenance. (mydrive@qbis.ro). Depending on requests complexity there can be additional fees per intervention when there is no maintenance contract. The fees level relates to complexity and confidentiality agreements required for the operation.

Being a software application solution that requires installation and implementation to the CLOUD provider with different scenarios, under a final client account, the technical support may be the subject of the implementation contract with an integrator. Q-bis Consult present a list of software integrator on the product presentation web pages.
